

Diabetic retinopathy is a medical condition that affects the eyes and is a complication of diabetes, specifically diabetes mellitus. This condition occurs when high levels of glucose (sugar) in the blood damage the small blood vessels in the retina, the light-sensitive tissue located at the back of the eye.

Report

Patient's Details

Name:-Asim maity Age:-47 years
Patient ID:-0014DM DOB:-10/03/1976
Location:-Burdwan State:-West Bengal

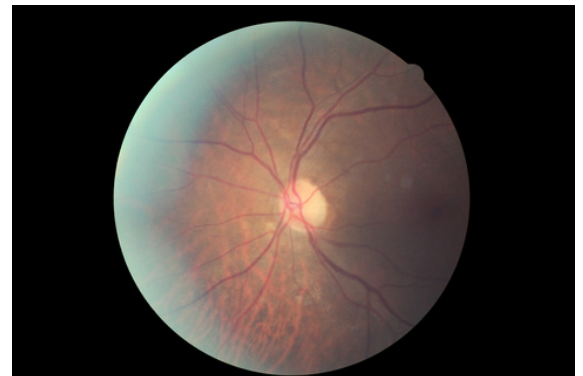

Eye Report

Right Eye Detection: -

IDR Result: Negative for vision-threatening DR

Left Eye Detection: -

IDR Result: Negative for vision-threatening DR

Results

Negative for more than mild DR in both eyes. Retest in 12 months.

Notes

A negative result indicates a low risk for moderate non-proliferative DR, severe non-proliferative DR, proliferative DR, and clinically significant diabetic macular edema
